Project Information Report

December 2008

Fred Burr Reservoir

November, 2008

MT DNRC State Water Projects Bureau

The State Water Projects Bureau (SWPB) administers the operation, management, and rehabilitation of state-owned dams, canals, and hydropower projects under the purview of the DNRC Water Resources Division.

The following report provides a complete list of the projects, along with additional information. The SWPB markets water from the state-owned facilities primarily for irrigation and administers approximately 1,965 water-marketing contracts through local water user associations. The total combined volume of water marketed by the SWPB per year is 293,609 acre-feet. Revenue from the water purchase contracts, leasing of lands associated with the projects, and net revenue from hydropower generation supplement funds for state water project rehabilitation costs. Debt repayment funds are derived from repayment contracts with water users.

The SWPB ensures that the projects are operated and maintained in a safe, efficient manner, are kept to current dam safety standards, and repayment contracts are properly administered. For additional information or questions, contact the DNRC State Water Projects Bureau.
